Dr.Web Anti-virus

Basic Dr.Web protection for Windows,
Android, macOS, and Linux

Dr.Web will protect your digital WORLD

All malware is created to commit crimes.

What's important to hackers is doing harm, causing damage, and the criminal earnings that result from those activities. What threats does Dr.Web protect against?

Protection against money theft

Against banking Trojans, keyloggers, and hacker attacks during online banking sessions

Protection against scammers*

Against phishing and fraudulent sites and sites containing malware

Protection against program vulnerabilities

Against exploits used by cyber-criminals to penetrate systems via errors in popular applications

Protection against money theft*

Against banking Trojans, keyloggers, and hacker attacks during online banking sessions

Protection against device hijacking and spying*

Camera, microphone, and removable device control

Protection for children against psychological and moral harm *

Parental Control

* Available only in Dr.Web Security Space.

Important! Today an anti-virus alone is not enough to protect a PC. All Dr.Web protection components for Windows — in Dr.Web Security Space.

Dr.Web security components

Operating system	Windows	macOS	Linux
Anti-virus Blocks viruses and malware from accessing the protected system and will cure the malignant programs that have already penetrated it.	✓	✓	✓
HTTP monitor* Scans webpages in real time and blocks access to dangerous sites, such as those used for phishing attacks.	✓	✓	✓
Anti-spam* Detects spam and other unsolicited messages in any language, with next to zero false positives.	✓		
Parental Control* Blocks access to websites by URL keywords and protects children from exposure to objectionable web content. The "restrict access" feature protects information located on removable data-storage devices and in files and directories from unauthorised access, theft, and deletion.	✓		
Firewall An impenetrable barrier to hackers attempting to break into your system.	✓		
Exploit Prevention Protects against malicious objects that take advantage of software flaws in popular applications.	✓		
Ransomware Protection Trojan-encoder protection based on behavioural rules for programs of this kind.			
Data Loss Prevention* Continuously protects files in user-selected folders from unauthorised tampering or deletion (disabled by default).	✓		
Privacy* Blocks the camera and microphone on a device to prevent unauthorised audio and video recordings.			
Removable device access control* Checks URLs on Doctor Web's server in real time.	✓		
Dr.Web Cloud Checks URLs on Doctor Web's server in real time.	✓		

* Available only in Dr.Web Security Space.

Why Dr.Web?

The Russian developer
of Dr.Web anti-viruses

Doctor Web has been developing
anti-virus software since 1992

Round-the-clock technical
support

System requirements
