

DEFEND WHAT YOU CREATE

Dr.Web Premium

for business

Anti-virus subscription

- Maximum Dr.Web protection for Windows, macOS, Linux and Android
- Windows Server/macOS Server protection for the same price as PC protection
- Subscribe and renew for one month or longer for as little as 1.65 EUR/month
- Discounts for the quantity of devices and the subscription term
- Auto renew, suspend, enable and terminate your subscription—with one click, whenever you want

Dr.Web Premium subscriptions provide high-quality anti-virus protection for employee PCs and personal devices.

Does it seem like hardly a day goes by without a trojan sneaking into your network?

Use Dr.Web to forget about trojans, phishing campaigns, and spam. Since 1992, the Russian anti-virus Dr.Web—one of the first anti-viruses ever— has been protecting computers in over 200 countries.

You're running a successful business and new employees are joining your team all the time?

With the Dr.Web Anti-virus service, you will ensure that their devices are well protected as soon as they get to work: add new devices to your subscription with just a couple of clicks. And if you're going through a downturn and need to reduce your staff, instantly terminate the subscriptions you don't need.

REASONABLE EXPENSES CUT

Pay only for what you use and only on the days when you really need the anti-virus. Thanks to flexible subscription-management options and good discounts, you can cut your anti-virus security costs.

TECHNICAL RISKS MINIMISED

Only a fraction of your company's working hours will be wasted—all thanks to the smooth and secure operation of your corporate infrastructure.

EMPLOYEES WORK EFFICIENTLY

Employees won't be distracted by spam, phishing emails, social media, job search sites, online games and online stores—boost your productivity even further!

SPAM AND PHISHING CAMPAIGNS WON'T SINK YOUR BUSINESS

Your employees won't open infected emails that deploy encryption ransomware—the messages will never reach their mailboxes because Dr.Web anti-spam will filter them out.

SECURITY BEYOND THE CLOUDS

Dr.Web also offers protection technologies for cloud-based and virtual solutions. Dr.Web protects the complete spectrum of operating systems, including Windows XP.

LOWER SERVER HARDWARE COSTS

You'll never have to add hardware and expensive server software purchase costs to your bottom line. Switching to Dr.Web requires no investments in new hardware.

PROFESSIONAL SECURITY SOFTWARE ADMINISTRATION

Competent anti-virus software administration conducted by the service provider's engineers will make your corporate anti-virus security extremely effective*.

* Depending on the service provider, your company may be granted access to the Dr.Web Control Center.

ROUND-THE-CLOCK FREE TECHNICAL SUPPORT
